YOUR ONE SOURCE FOR EVERY VCI SOLUTION

Effective Corrosion Preventive
Packaging for Industry:

- Automotive
- Metalworking
- Aerospace
- Heavy Equipment
- Export Shipping

No Substitute For

Today, as companies seek ways to reduce costs yet maintain quality in all stages of manufacture, storage and shipment, Daubert Europe is there to offer them innovative solutions for complete corrosion control.

Daubert Europe is a pioneer in the development of volatile corrosion inhibitor (VCI) technology for industry. Since the 1940's, its unique brands of packaging papers, poly films, liquids and devices have become recognized worldwide for unsurpassed quality, performance and superior protection.

VCI PAPERS

Daubert Europe manufactures a wide range of VCI papers to accomodate specific packaging requirements. Whether a customer needs to protect parts for days or years, Daubert Europe has a product to meet that need. MasterShield®, PowerShield®, Nox-Rust®, and Coppertex® are among the brands manufacturers trust to provide superior protection for ferrous and non-ferrous metals.

When the packaging must meet stringent automotive industry requirements, customers turn to the array of Daubert Europe papers for proven, reliable, highest quality corrosion protection.

Silver Saver® is unique in the packaging industry as the only anti-tarnish paper for protecting sensitive electronics, jewelry, coins, and noble metals.

All Daubert Europe papers can be converted into sheets, bags, and wraps for individual parts: shrouds, covers and liners for large pieces or stacks of parts. The protected metals stay clean, dry, and ready to use during export, storage and in-process manufacturing.

VCI FILMS

Our Clear Pak®, Premium Metal-Guard®, Ferro-Film® and Metal-Guard® product lines meet the highest standards for proven corrosion protection. VCI active ingredients integrated in the film protect metal parts against corrosion, moisture, salt and other contaminants. All films are recyclable.

Our film combines Daubert Europe's high-quality corrosion inhibitors and the best film quality. This results in an extremely water-impermeable, heat-sealable and economical product.

The Daubert Europe film product range covers all common metal alloys such as iron, steel, cast iron, aluminum and multi-metal. All are transparent, strong, and tear-resistant, making them ideal for large and roughly handled packages. Films are available as sheeting/flat film, resealable bags, gusseted or flat bags, bonnets, and custom shapes. Our on-site team will gladly advise you if you need special designs for your products.

Stretch Film and X-O Barrier Wrap

VCI stretch film offers the handling ease of polyethylene with the corrosion protection of VCI chemistry.

X-O Wrap films are available for ferrous metals, for multi-metals, and non-VCI film for general use. All recyclable.

SPECIALTY VCI PACKAGING

Daubrite® Emitters: Disks, Packets, Foam & Chips

Daubrite foam and disk emitters prevent corrosion in the tightest of spaces, such as electrical boxes, control panels, telecommunications equipment, and more. When the corrosion-inhibiting vapors are released, they form an invisible barrier of VCI protection. Emitters are safe, easy to install, and last for years.

Nox-Rust® Liquids and Coatings

More than 20 different types of rust preventive liquids and coatings protect metals during storage and transportation, in lay-up and preservation applications, during and after hydrostatic testing and in all types of indoor/outdoor storage conditions.

Rust Removers

Rust Revenge® is an easy-to-use, water-based rust remover that soaks away surface rust without scrubbing. Non-hazardous, non-acidic, ready to use.

Let us put a Daubert 360 program to work for you today.

Our global team of VCI experts can provide on-site consultation, analysis, and inspections as part of a comprehensive corrosion management plan for exporting and storing metal assemblies and equipment.

An integrated anti-corrosion system and customized preservation plan ensures that all stages of product handling, from production through international transit, are carefully monitored, tracked and evaluated at every step.

Worldwide VCI expertise and Innovation

In addition to the Chicago area headquarters, the company also has operations in China, Europe, Brazil, and Mexico coordinating global sales efforts worldwide.
